Press Release

High Performance Built-in speaker Customization added to IC Woodworks cabinet options.

Lakeville, July 25, 2003: ImageCrafters Inc. IC Woodworks division introduces the newest option in made to order home theater woodwork – ICSP, ImageCrafters Speaker Performance option adds intelligent customization to IC's performance based cabinet systems. House not only your electronic components, but also your speakers in cabinetry built to optimize select speakers systems including Boston Acoustics new BT Series in-cabinet speaker system. ImageCrafters booth #308 and Boston Acoustics booth #430 at CEDIA Expo 2003 will debut customized models.

Designed to accept two subs 18" X 18" X 22" in individual compartments with cut outs that allow the sub to sit on the floor and fill the room through vents cut in the front of the base. This option customizes the wall system to allow easy access to controls and optimize sound performance while hiding the system behind beautiful wood doors.

L & R Channel Speakers are fit into compartments hidden behind matching wood doors with acoustic grill panels. Boston provides special fill material to aid in the process. The Center channel sits inside or on an open shelf above the TV

At IC Woodworks, we understand the specific needs of today's home theater systems and design furniture to meet your specific requirements now, and in the future. The IC Woodworks collection provides convenient, practical storage for your audio/video components, plus styling that will enhance any décor. With two different construction styles, and a wide range of available hardwoods and finishes, IC Woodworks furniture is equally at home with heirloom antiques or contemporary home furnishings.

Price typically ranges from \$2000 to \$6000 with a 6 to 8 week lead-time. IC Woodworks is sold at leading audio video specialty retailers nationwide. Visit www.imagecraftersinc.com to find a dealer near you.
